CprE/SE 492 May1620 Weekly Report 13

A Sociotechnical Solution to Large-Scale Formal Specification Mining
Reporting period:April 2 - April 9
Advisor / Client: Professor Rajan (ComS)
Members: Cody Hanika (Team Leader, Communication Leader),
　　　　　Alex Dana (Web Master/Concept Holder)

Weekly Summary:

- No Client-Advisor Meeting
- Worked on loading/using multiple rule files
  - Could hopefully allow us to use different files based on the type of package the methods are in
- Wrote a program to parse out all the Javadoc for any package in the Java standard library

Goals for Next Week:

- Continue work on multiple rule files
- Add onto our program that loads the Javadoc for each method to run our analysis to test how successful it is across an entire package
- Find common structures of documentation text from which we can create rules to successfully parse more documentation
